

Wilcox Oil Company: Katrina Higgins-Coltrain (Remedial Project Manager) and Todd Downham (Oklahoma Department of Environmental Quality Project Manager) continue to coordinate with the tribal groups interested in the Wilcox Site. The ITEC, Sac and Fox Nation, Muscogee (Creek) Nation, Cherokee Nation, BIA, and IHS, are interested in the site and participate in the site meetings and visits. Update meetings and discussion related to the Remedial Investigation/Feasibility Study process, current status and progress, and schedule of future activities were held in April and March 2015. A meeting was held August 26, 2015, to discuss and identify areas of cultural and historical significance that could be impacted by site related activities. On September 24, 2015, a follow-up site visit with the Muscogee (Creek) Nation cultural and historical preservation departments and Sac and Fox Nation was conducted. In addition, interested persons visited the site during field work conducted December 2015. Currently EPA is working to review field data from September and December 2015 and develop site-specific sampling. At this time, the documents are tentatively scheduled to be shared with the team in June/July 2016. Also, the July 2016 timeframe is tentative for the next open house with the community.
